

World Environment Day Celebrations

On June, 5, 2019, Save The Environment (STE) jointly celebrated World Environment Day with Millan Samity, Hrishikesh Park, Kolkata. The NGO has been persistently working to spread awareness among the society about various means to control environmental pollution and enrich the biosystem. Members of the organization at Kolkata took initiative to organize celebrations of the World Environment Day. As a matter of fact, the budding generation, especially the school children are the future builders of our society. It is therefore, vital to facilitate them with the necessary knowledge about protection and conservation of our environment.

The Chief Guest of the event was Professor Gaurab Gangopadhyay, Bose Institute, Kolkata and was presided by Dr. Sandip Ghosh, Principal, Poddar Institute of Technology and Management, Salt Lake, Kolkata. The occasion included poster making competition for school children between the age group of 12 to 15 years and the theme was environment pollution. An “open to all” quiz competition was also held and questions concerning the environment were asked by a talking doll.

A seminar was conducted where our Chief Guest and President presented a talk on how the society is contributing towards environmental pollution such as global warming. They also described the various ways to control the pollution and inculcate certain good habits in our daily practices to conserve the natural resources such as water. At the end of the seminar the children who won the competitions were awarded. A magic show was also organized for the children to enjoy the event. The participants showed their complete enthusiasm and activeness among the children was a booster in itself for the members of STE.

The organization, STE is thankful to Professor Gaurab Gangopadhyay and Dr. Sandip Ghosh for accepting the invite and gracing the occasion with their kind contributions. We also thank our joint partner, Millan Samity, Hrishikesh Park, Kolkata for enabling us in successfully achieving the celebrations of World Environment Day. In future also, we wish that more such organizations come forward and enable the society to conserve and protect the Mother Earth. As an NGO working for the environment, all the members of STE will continue to make the general population aware about the environmental pollution, adversities related to it and various ways (economic and eco-friendly) to combat the menace.
